BETTER FLOWERS and VEGETABLES ARE YOURS WHEN YOU PLANT OUR SEEDS!

TENDERGREEN

53 days. Plants make a strong, vigorous growth; are well branched and bear a great quantity of beautiful dark green, round, extremely meaty, tender pods, 6 to 7 in. long. Absolutely stringless at all stages of growth; always free from fiber, and of the most delicious flavor. Pods mature early and are borne profusely for a long time. The attractive appearance of the high quality pods makes them ideal for market or canning.

Pkt. 10c—7 oz. 20c—14 oz. 35c—2½ lb. 75c

FULL MEASURE

54 days. Medium-early, well-branched round plants bearing a large crop of perfectly stringless, very fleshy, deep green round pods measuring 5 in. in length. Quality is superb and the flavor rich and satisfying. Popular on account of its high yields and long picking season. Ideal for home and market growing.

Pkt. 10c—7 oz. 20c—14 oz. 35c—2½ lb. 75c

BEANS

BOUNTIFUL

48 days. Bears continuously for several weeks, being the first to give pods fit to pick in the spring. Under favorable conditions of soil and season this variety has been known to bear one bushel of pods per 15 feet of row. The pods are long, flat, slightly curved, tender, of delicious flavor and practically stringless.

Pkt. 10c—7 oz. 20c—14 oz. 35c—2½ lb. 75c

GIANT STRINGLESS GREEN-POD

51 days. The straight, rather slender pods grow 6 in. long and are meaty, round, brittle, and absolutely stringless. Somewhat similar to Burpee's Stringless Green-Pod. Seeds are a light brown color. The plants are of strong growth, making large and compact bushes that bear a heavy crop of pods for a long time.

Pkt. 10c—7 oz. 20c—14 oz. 35c—2½ lb. 75c

This is the Year to Plant That Big Vegetable Garden KENTUCKY WONDER BEAN FROST PROOF BEAN OR LIMA PEA

This Bean is one of the finest green pole beans that has ever been placed on the market. The pods are nine to ten inches long and so well filled and thick fleshed that they are nearly round. It is entirely stringless, cooks tender, and is deliciously flavored. Kentucky Wonder Beans are a real everbearer, and if the pods are picked off as they ripen, it will continue to bear right through the season until killed by the fall frosts. It will bear a fine crop without being poled, but when poles or brush are used, it is much easier to harvest.

Pkt. 10c—7 oz. 20c—14 oz. 35c—2½ lb. 75c

This bean is highly esteemed in Europe, and is known there as the Broad Bean. It differs from American types of beans in that it should be planted early. Plants are hardy and not sensitive to cold.

The beans are as large as the largest Lima Beans, and nearly the same shape. Botanically, it belongs to the bean family, but the flavor is more like that of the pea, which accounts for it sometimes being called the Lima Pea. The plant is a bush of upright growth, about 2½ feet high, with strong, sturdy stalks. Pods 5½ inches long and 1½ inches wide, flat and straight. Each holds 3 to 4 mammoth size beans. It is wonderfully productive. The Frost Proof Bean, or Lima Pea, is used like the Lima Bean, and is delicious either cooked fresh or as a winter shell bean.

Pkt. 10c—7 oz. 40c—14 oz. 60c

Improved GOLDEN WAX BEAN

Undoubtedly one of the best wax beans for the home garden. Rust-proof, an improvement of the old style Golden Wax. Pod is semi-round, yellow, of good quality, and it has no strings. Ready for picking 47 days from planting.

Pkt. 10c—7 oz. 20c—14 oz. 35c—2½ lbs. 75c

NEW AND UNUSAL BEANS

THE CHESTNUT BEANS

This wonderful Bean looks like a gigantic pea. When boiled, it has a flavor like boiled chestnuts; one of the most delicious beans grown. Grows in the form of a tall bush and is completely covered with pods. For soup and turkey stuffing it cannot be surpassed. It is a Spanish Bean, and is known as the "Garbanzo." We have but a limited amount of seed to offer.

Pkt. 10c—3 pkts. 25c

GIANTIC TASMANIA BEAN

The Giantic Tasmania Bean will astonish you with its size and win you with its genuine goodness. The flesh is very tender and of delightful piquant flavor. This bean grows to an enormous size, single fruits weighing as much as 18 pounds. It should be eaten when about 6 pounds in weight if you want it at its best. It is easy to grow and is almost entirely free from disease and insects. Wonderfully prolific, much easier to grow than a squash, and is very productive. It may be grown on a trellis similar to pole beans. It can be prepared for the table in many ways, and when either fried, baked or boiled, it is most delicious in flavor.

Pkt. 10c—3 pkts. 25c

HOPI INDIAN BEAN

This Bean has been grown by the Hopi Indians of Northern Arizona from prehistoric times under strictly dry farm conditions and crude farm practices. In trying these out, we find them to be a very fine eating bean. A small crop was grown in 1933 and the growers claim that they produced more heavily than any bean we have. They are semi-vining, long rooted, drought-resistant beans, and should be placed in rows 30 to 40 inches apart. They require the full Summer season and should be harvested before frost. They have the true large lima flavor and the Indians claim they are strongly anti-acid, in this being very much different from the usual Navy and Pinto beans and can be eaten with benefit by people who cannot digest most beans. The great productivity of this bean under general climate conditions should make it very popular with gardeners and we suggest that you try out a supply this year.

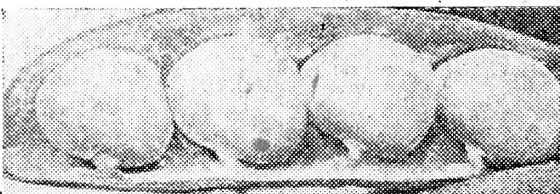

Pkt. 10c—7 oz. 35c—14 oz. 50c

GIANT AZTEC BEAN

The Giant Aztec is a real bean; looks like a field or navy bean except that it is 8 times as large. 18 or 20 Giant Aztec

Beans usually weigh an ounce, while it takes from 160 to 170 of the common field beans to weigh an ounce. It is a bush bean; will stand more drought than most varieties—very hardy—and probably the most productive bean grown.

Pkt. 10c—3 pkts. 25c

BUSH LIMA BEANS

PURPEE'S IMPROVED BUSH—The largest of all Bush Limas, bearing pods almost equal in size to those of the large Pole Limas. Pods 5 to 6 inches long by 1¼ inches wide, and the full size beans are of luscious flavor.

Pkt. 10c—7 oz. 25c—14 oz. 45c

POLE LIMA BEANS

KING OF THE GARDEN—A vigorous grower, requiring but two vines to each pole. Begins flowering early, at the bottom of the pole, producing a continuous bloom and fruitage throughout the season. Pods are large, and beans are of excellent quality, well-formed and mammoth in size.

Pkt. 10c—7 oz. 25c—14 oz. 45c

THE BEST SEEDS ARE THE CHEAPEST SEEDS

TABLE BEETS

CROSBY'S EGYPTIAN

48 days. An early-early variety for home and market garden use. Unexcelled for bunching. Roots are smooth, round, with slightly flattened tops, small tap-root. The flesh is very dark blood-red. Tops are medium and the roots deep purplish red. Crisp and tender.

Pkt. 10c—3 pkts. 25c—7 oz. 50c

DETROIT DARK RED

59 days. An early maturing beet of remarkable uniformity. Solent for the home garden, market, shipping and canning. Perfectly round and of a deep red color. They reach 2½ to 3 in. in size and have a small collar and a thin tap-root. The flesh is very blood-red, showing hardly any zones. It is tender, fine-grained, exceptionally sweet. Medium size foliage.

Pkt. 10c—3 pkts. 25c—7 oz. 50c

CABBAGE

LIGHTNING EXPRESS

The Earliest Cabbage in Cultivation

Our Lightning Express is ready for use in 65 to 70 days from sowing—ten days earlier than Jersey Wakefield. Good fair trials of varieties offered by other seed houses as "the earliest grown" have proved that they are from four to ten days later than our Lightning Express.

LIGHTNING EXPRESS is positively the earliest cabbage in cultivation. The heads are pointed, of good size, a little smaller than Jersey Wakefield, always sure to head, solid and firm, and always in demand on the market, bringing high prices on account of their extreme earliness. Very hardy, permitting earliest planting. There are but few outer leaves, and plants may therefore be set closely together. As many as 14,000 heads can be grown on one acre of ground, and will bring a larger profit per acre than later and heavier varieties.

Pkt. 10c—3 pkts. 25c—¼ lb. 90c

COPENHAGEN MARKET

One of the finest early round-headed cabbages in cultivation. It is desirable on account of the remarkable characteristics of maturing the heads all at the same time, enabling the grower to gather his crop with less expense and permitting the cleaning of the land at the first cutting. The heads average about ten pounds each in weight, are hard and solid with small core. The quality is extra fine and sweet. It is a short-stemmed variety, the heads nearly resting on the ground. The leaves are light green, rather small, saucer-shaped and tightly folded, making it possible to set them close together in the field.

Pkt. 10c—3 pkts. 25c—¼ lb. 90c

MAMMOTH RED ROCK

By far the best, largest and hardest heading red cabbage in cultivation; very uniform in size, weight, solidity and deep red color. The heads grow to weigh ten or twelve pounds.

Pkt. 10c—3 pkts. 25c

PREMIUM LATE FLAT DUTCH

This variety of late cabbage is standard in all sections for winter use. It makes a large solid head, which keeps long without bursting, and is adapted to a more varied climate than probably any other variety.

Pkt. 10c—3 pkts. 25c—¼ lb. 90c

Grow Your Own DILL Used in making "dill pickles" Pkt. 10c—3 pkts. 25c

TURNIP ROOTED CELERY

A popular vegetable in Europe. Instead of producing long leaf stalks like ordinary celery, it has a turnip-like root with the true celery flavor and is greatly liked by nearly all who have tried it. Excellent for salads and flavoring, or cooked like parsnips, turnips or oyster plant.

Pkt. 10c—3 pkts. 25c—¼ lb. 90c

CHINESE CELERY CABBAGE

A most delicious vegetable which combines the rich celery flavor with that of the cabbage. Can be cooked or eaten like celery. Makes as good salad as the finest head lettuce. The mid-ribs can be cooked like asparagus, and, for cold slaw, no cabbage compares with it—One of the most delicious vegetables yet introduced, and bound to become one of the most popular.

Pkt. 10c—3 pkts. 25c—¼ lb. 70c

NEW CORELESS CARROT

A new rapid growing early variety of superior flavor; tender and without any woody heart or core. Roots are half-long, blunt-pointed and grow to a medium size; are very smooth, and of a deep orange-red color. Highly recommended for market or home use when either young or full grown.

Pkt. 10c—3 pkts. 25c—¼ lb. 70c

CUCUMBERS

CLIMBING CUCUMBER

A wonderful Cucumber from Japan. Vines extra strong, vigorous and great climbers, producing surprising amounts of superior fruit on poles, fences, side of house, etc. Three times the usual crop from the given area can be grown from this variety. Nice, green color, and fine for slicing and pickling. Sets fruit constantly throughout the season.

Pkt. 10c—3 pkts. 25c—¼ lb. 60c

LEMON CUCUMBER

Similar in size, shape and color to a lemon. Flavor that is sweeter and somewhat different than other cucumbers. They are highly esteemed for pickling, either green or ripe, and for slicing just as the fruits are turning yellow. Will yield four times as many cucumbers as any other variety.

Pkt. 10c—3 pkts. 25c—¼ lb. 75c

STAYSGREEN

The greenest of the Long White Spine Cucumbers. About seven inches long; excellent shape and quality. Begins bearing very early, and picking period extends over a long time.

Pkt. 10c—3 pkts. 25c—¼ lb. 50c

WHITE WONDER

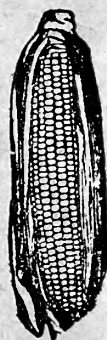

Color of White Wonder is beautiful pure white. Remarkably uniform in shape and size, averaging 8 inches long by 2½ inches thick. Begins to bear early in the season and continues until fall. Flavor is pleasing and flesh firm and crisp. Aside from the excellent quality of the fruits, White Wonder bears a great quantity of them. A packet of seed will furnish you cucumbers in abundance.

Pkt. 10c—3 pkts. 25c—¼ lb. 60c

BARDEN'S WONDER BANTAM SWEET CORN

This matchless Sweet Corn is a cross between Golden Bantam and Early Wonder, the result of which is a Bantam Sweet Corn with all the qualities and sweetness of the old reliable Golden Bantam, but with larger ears set up higher on the stalk. Ears 8 to 10 inches long, filled with 8 rows of broad, rich, golden yellow kernels. Stalk 5 to 6 feet high. Critical market and home gardeners and canners have long been looking for a Bantam Sweet Corn with these improved qualities. One of the big canning companies reports that Barden's Wonder Bantam produces one-third more tonnage per acre than any other Bantam Corn they have ever grown, and will consider using no other in the future. Tests each year have proved it to be as early as Golden Bantam and much more vigorous and productive.

Pkt. 10c—7 oz. 25c—14 oz. 45c

BLACK MEXICAN SWEET CORN

This is one of the richest flavored, sweetest, and tenderest sweet corns. To many of those who know it, no other variety can take its place. The ears are 8 to 9 inches in length, and are ready for the table in 85 to 90 days. The ripe seed is bluish black, but when in table condition the kernels are pearly white. It is a most desirable second early variety for the home garden.

Pkt. 10c—7 oz. 25c—14 oz. 45c

COUNTRY GENTLEMAN

This variety is often called the shoe-peg corn, owing to the arrangement of the crowded kernels. It is nearly as sweet as Golden Bantam. It remains tender longer than most sorts. Ears average 9 inches in length; the cob is small and very closely packed with slender, pure white kernels. It arrives at full perfection just in time to succeed the earlier varieties.

Pkt. 10c—7 oz. 25c—14 oz. 45c

SNAKE CUCUMBER

Like its name, this curious cucumber resembles nothing so much as a long, green snake. It is often 6 feet in length and is a distinct novelty variety. Seed should be planted early to obtain best results. Excellent for pickling and slicing.

Pkt. 10c—3 pkts. 25c

VEGETABLE SPAGHETTI

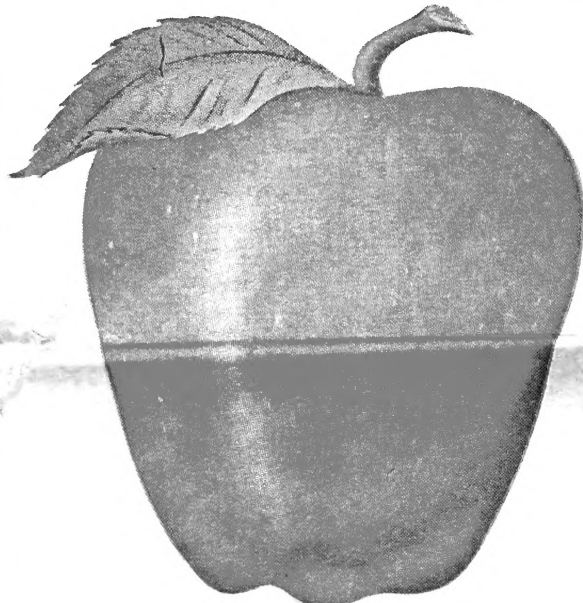

This delicious new vegetable from Persia thrives in all climates and in any ordinary garden soil. Each plant produces from six to ten beautiful bright yellow, oblong fruits about 8 to 10 inches long. Each fruit is filled with a delicious spaghetti-like pulp. When fully ripe, the whole fruit (without cutting or peeling) should be cooked 20 minutes in boiling water; then cut in half. A dishful of this delicious vegetable spaghetti comes out of each fruit. Season with salt, pepper and butter and serve hot. Can also be served hot with catsup or tomato sauce or served cold, as a salad, with mayonnaise or French dressing. This remarkable vegetable is one of the most valuable and useful of recent introductions, and should be grown in every garden.

Pkt. 10c—3 pkts. 25c—¼ lb. 60c

J. H. Hale—Freestone, yellow with red blush, large.

Elberta Cling—Mid-season, yellow.

Early Elberta—Freestone. 10 days earlier than Elberta.

Elberta—The great market peach. Yellow freestone.

200 Bushels Peaches from 30 Trees

Benton County Nursery Co., Rogers, Ark.

Dear Sir: I want to thank you for the healthy and nice trees I got from you about five years ago. I didn't expect to get such nice trees from you for so little money. I bought some trees from another nursery about six years ago and I never got half the fruit as I got from the ones I bought from you and the trees I bought from you are one year younger, and I will say that they are the best peaches and cherries and apple trees I have ever bought from any nursery at the price. I bought from you and the best fruit I should say it is. I got about thirty peach trees and I got about 200 bushels out of them the past summer. I got about ten apples but we got just a few apples, but they are sure nice and big apples, and they are sweet, too. I got a few cherries, but they are sure large and sweet. The trees are still too young to give lots of fruit but it is sure nice fruit. If I order another lot of trees this spring, I will order from you. I will tell my neighbors and friends, too. You can feel sure that I will send you my future orders.

Very truly, Ermo Sanchez, Embudo, New Mexico.

ONIONS

JAPANESE Long-Bunching ONION

A valuable introduction from Japan which, on account of its merit, is sure to meet with popular favor for young green onions. It forms no bulb, but produces a long white tender root as shown by the illustration. Superior to any other hardy bunching onion in that it remains always tender and mild, and owing to quality and fine appearance, it makes an attractive bunch that sells at an advanced price over other varieties. Our Japanese growers inform us that in Japan this onion is often blanched 24 inches. With this variety you can have bunching onions of the very best quality all through the summer. Its garden is complete without a row of these onions. A money-maker for market gardeners.

Pkt. 15c—2 Pkts. 25c—5 Pkts. 50c

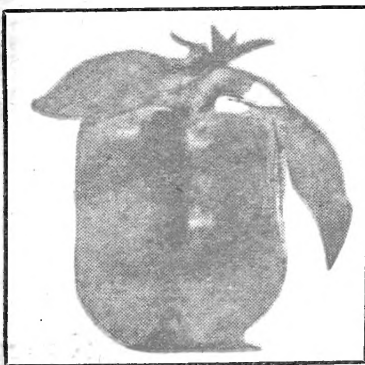

See Our Low Prices on Onion Plants Elsewhere in This List

EBENEZER

The Extra Early, Long Keeping, Mild Onion

One of the mildest flavored onions grown. The flesh is white, firm and of a very delicate flavor. The onions are quite similar to Yellow Globe Danvers in shape but much larger in size, yellow skinned and have very small tops and mature early. Many people who know this onion will have no other kind for their own table. In the localities where it has been grown, the onions of this variety command much higher prices than other kinds. Those who want a nice mild onion, either for large onions or bottom sets, would do well to try the Ebenezer. Sets are grown the same as large onions, except that the seed is sown thickly—one pound of seed to each 100 feet of drill. These sets, if planted early in the spring will produce ripe onions in July, at which time they will bring a high price. Sets of this variety rarely produce seed stalks as other kinds do. The Ebenezer is such a good keeper that even those ripening in July will keep sound and hard through the fall and all winter. Don't fail to plant some Ebenezer onion seed this season, sowing some for large onions and some for sets.

Pkt. 10c—3 Pkts. 25c—1 oz. 40c

PEPPERS

California WONDER

75 days. If you want a large, heavy, dark, glossy green Pepper, of the finest flavor, this variety meets your requirements. Produces an abundance of handsome, blocky, 4-lobed, uniform fruits 5 inches in length and 4 inches across, which, when ripe, turn into a brilliant crimson. The thickness of the flesh alone (often 3/4 of an inch) places it ahead of all other sorts, and makes it a premier shipping variety. Disease-resistant.

Pkt. 10c—3 pkts. 25c

CHINESE GIANT

Most gigantic of all Giant Peppers. A fine mild red pepper of enormous size, magnificent appearance, and brilliant, glossy scarlet color. The flesh is mild and unusually thick.

Pkt. 10c—3 pkts. 25c

LONG RED CAYENNE

(125 days.) A well-known medium early variety, having a slender, twisted and pointed pod about four inches long. Color deep green when fruit is young; when ripe, of a bright red color. Extremely strong and pungent.

Pkt. 10c—3 pkts. 25c

PEAS

Fresh Green Peas from Your Own Garden are Delicious!

LITTLE MARVEL

62 days. Extensively grown in Florida for early shipping because of its exceptional quality and yield. The dark green vines are 18 to 20 inches tall, vigorous, and bear pods 3 inches in length, nearly round, square-ended, and well filled with 6 to 7 large, deep green peas, sure cropper of unsurpassed sweetness.

Pkt. 10c—7 oz. 20c—14 oz. 35c

EARLY ALASKA

50 days. Used extensively for canning; also by market gardeners for a first-early crop. Vines slender, light green, and grow about 2 1/2 feet tall; bear well-filled, square-ended bluish green, round, straight pods 2 1/2 inches in length. Seed small, smooth, and bluish green. Very hardy and productive.

Pkt. 10c—7 oz. 20c—14 oz. 35c

THOMAS LAXTON

57 days. This has no superior as an early pea of medium height. The vines are strong, with large dark green foliage, and grow 2 1/2 to 3 feet tall. They bear a surprising number of dark green pods, blunt-ended, and 4 to 4 1/2 inches long. These are well filled with large, tender peas which retain their pleasing flavor and sweetness until they begin to harden. Unsurpassed for the home garden and shipping.

Pkt. 10c—7 oz. 20c—14 oz. 35c

AMERICAN WONDER

63 days. Dwarf variety, growing 12 to 14 in. tall and maturing in a few days after Alaska, but of sweeter flavor and wrinkled-seeded. It is particularly suited for the home garden where space is limited. The pods are close to 3 in. long and about 1 1/2 in. wide, plump, straight and have a blunt end. There are 5 to 7 large delicious peas in every pod. Vines are very profuse bearing, the pods remaining in good condition for a number of days.

Pkt. 10c—7 oz. 20c—14 oz. 35c

OKRA

WHITE VELVET

Strong, tall-growing, 3 1/2 to 4 feet in height. The pods are about 6 to 7 inches long, white, slender, fleshy, and very tender. Early maturing and extensively grown for home use and local markets.

Pkt. 10c—1/4 lb. 25c

Dwarf Long Green Pod

Early and very prolific. Grows 2 1/2 to 3 ft. tall; pods dark green, fleshy and tender, become 7 to 8 inches long and 1 1/4 inches in diameter; tapered near tip.

Pkt. 10c—1/4 lb. 25c

WE PAY THE POSTAGE ON ALL SEEDS

CHINESE MONEY PLANT

A beautiful, hardy biennial, about 2 feet in height, which is known in the different provinces of China as the silver, satin or money plant, and in Europe as St. Peter's Penny. Flowers are violet-purple, white, and dark crimson, followed by the silvery seed pods that present a beautiful and rather curious appearance. When dried, the stems, which are loaded with these glistening seed pouches, will last indefinitely and are exquisite for winter bouquets and other decorative purposes.

Pkt. 15c—2 Pkts. 25c

PUMPKIN

SWEET POTATO PUMPKIN

Tennessee Sweet Potato is an excellent sort which, when cooked, resembles a sweet potato in flavor, but is of more delicious taste. It is pear-shaped and slightly ribbed. The color is creamy white, sometimes striped with green. The flesh is fine grained and very dry. Fruit when cooked like sweet potatoes, and nothing superior for making pies and custards. Maturing in 95 days, is hardy and productive, and keeps perfectly sound until late in the spring.

Pkt. 10c—3 pkts. 25c—1/4 lb. 50c

JAPANESE PIE PUMPKIN

A high quality pumpkin of Japanese origin. The flesh is very sweet. Seed cavity small. Of medium size, early, very productive and a good keeper. Highly desirable as a pie or cooking pumpkin. The seeds are distinct in appearance, being curiously sculptured in the same manner as Japanese letters.

Pkt. 10c—3 pkts. 25c—1/4 lb. 50c

New Guinea Butter Vine

One of the Most Delicious of All Vegetables

The New Guinea Butter Vine is a wonderful vegetable. Grows to enormous size, one fruit often weighing 15 lbs. and from 3 to 5 feet long. In growth it is similar to the squash, and can be grown in the same manner or can be trellised up. It is more productive than squash and much easier to grow. The vines are always free from disease and insect pests, and stand more neglect and abuse than any other vegetable vine we know of. The fruit should be eaten when small, while the fuzzy growth is yet on. It can be cooked like Squash and fried like Egg Plant. When cut up in small pieces and cooked with cream, or fried, it is most delicious. If trellised up, the vines take up so little space, no garden is too small for at least two or three plants.

Pkt. 10c—3 Pkts. 25c

SQUASH

DELICIOUS

Unsurpassed by sweetness, richness of flavor and extraordinary quality. Excellent for fall and winter use; keeps well until late in the spring. Fruits usually weigh 5 to 10 lbs.; dark green, mottled with lighter shades; dark orange flesh; very thick and fine grained.

Pkt. 10c—3 Pkts. 25c—1/4 lb. 50c

RADISHES

WHITE ICICLE

27 days. Clear white roots which grow to a length of 6 inches, slender and tapering at the tip, brittle as ice and of mild, inviting flavor. A fine variety for both market and home gardeners who want an early, long white Radish.

Pkt. 10c—1 oz. 15c—4 oz. 45c

SCARLET TURNIP WHITE-TIPPED

25 days. This Radish is a table delicacy, crisp, tender and sweet. A very deep scarlet with a distinct snow-white tip covering about one-third of the lower part. Medium in size, nearly round, with small tap-root. We offer a high-class, refined strain. Extensively used by truckers and in home gardens. Should be pulled when 1 to 1 1/4 inches in diameter.

Pkt. 10c—1 oz. 15c—4 oz. 45c

CRIMSON GIANT

28 days. If you desire a Radish of more than two bites, you will find this to your liking. The crimson roots are large, globular, 1 to 1 1/4 inches in diameter. Flesh is white, crisp, and of splendid quality. It grows quickly and remains tender and of fine flavor to the last. Valuable for home-garden use. The white flesh holds its firmness well. The tops are medium small.

Pkt. 10c—1 oz. 15c—4 oz. 45c

SPINACH

BLOOMSDALE SAVOY

Extra dark green strain. A new, beautiful, better and darker strain. Its glossy green color gives the plants a fresh appearance for a longer time and it is quite early. The leaves are large, fleshy and deeply crumpled. The plants are of upright growth.

Pkt. 10c—3 Pkts. 25c—7 oz. 50c

MUSTARD

Southern Giant Curled

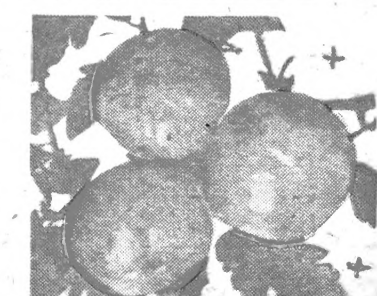

Leaves are large, light green, crimped and frilled at edges. The plant is upright or slightly spreading in growth. Can be eaten like lettuce or boiled for "greens." Highly valued on account of its vigorous growth, hardiness and good quality.

Pkt. 10c—1 oz. 25c

NEW TREE TOMATO

A wonderful variety that grows upright better than any we have ever seen. Tomato firm, solid, thick flesh, large meaty centers. Fruit is purplish pink. Form always round and symmetrical and of medium size. Very productive. When tomatoes grow heavy limbs will break unless supported.

Pkt. 10c—3 Pkts. 25c—1 oz. 45c

TOMATOES

GIANT OXHEART TOMATOES

Oxheart is a giant among tomatoes. It is smooth, thick, round and almost seedless. Frequently showing two inches thick without a seed cavity. Three pound specimens are quite common. A pink tomato with a delicious mild flavor that every lover of fruit likes. For quality, it is unequalled and, as it becomes better known, it is sure to be one of the most popular tomatoes yet introduced.

Pkt. 15c—2 Pkts. 25c—1 oz. 65c

BREAK-O-DAY TOMATOES

The Earliest, Disease Resistant, Globe Shaped, Scarlet Fruited, Meaty Tomato Yet Introduced

We are pleased to be able to supply our customers with seed of this wonderful Tomato, which is the result of the most recent and scientific research in tomato growing by Dr. Fred J. Pritchard of the U. S. Department of Agriculture. Break-O-Day is a hybrid as early as Earliana, about two weeks earlier than Marglobe. The foliage is similar to that of the Earliana. The fruits are of the Marglobe type, deep globe shaped, solid, meaty, with but few seeds, and of a scarlet color. No acid, just full of delicious sweet bearing early, but is an abundant yielder throughout the entire season. We can highly recommend Break-O-Day to market growers, home gardeners and canners.

Pkt. 10c—3 Pkts. 25c—1 oz. 40c

RUTGERS—THE IDEAL TOMATO

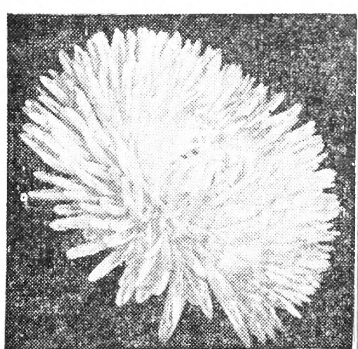

Developed at the New Jersey Experiment Station and highly recommended for canning, market and home garden, and is particularly suited for the manufacture of a fine-flavored, high-colored Tomato Juice. Fruits medium to large, similar to Marglobe, except more flattened at stem end. The fruit has thick outer and inner walls, with very small seed cavity. The flesh is firm and red. The plant is rather large. The natural abundance of foliage serves as ample protection from sun scald of fruits when light, sandy soils are used.

Pkt. 10c—3 Pkts. 25c—1 oz. 40c

FLOWER SEEDS

WHY NOT HAVE GORGEOUS BLOOMING FLOWERS THROUGHOUT THE SUMMER?

FLOWER SEEDS

SALPIGLOSSIS

PAINTED TONGUE
Mixed Colors. One of the most illustrious and brilliant of all garden annuals. It is a branching grower, carrying numerous petunia-like flowers in colors ranging from white, rose, scarlet, crimson, yellow and purple to deep violet-blue—all strikingly veined and netted in silver and gold. Highly prized as a cut flower and extremely showy in beds and borders, blooming continuously for several months. Prefers sunny location. Height 2 1/2 feet. Pkt. 10c—1/2 oz. 50c.

ASTERS

Giant Ostrich Feather Asters

We are now offering improved strain of Giant Ostrich Feather, and consider it the finest of all Asters. The plants are about 2 1/2 feet high, robust in growth, and branch freely, and are loaded with magnificent feathery, full, fluffy flowers par excellence. Beautiful mixed colors.

HEART OF FRANCE

The best pure red Aster ever introduced. All others have tawny shades of blue or too much yellow in the color pigments. Heart of France opens red as the purest ruby, deepens with age, and retains its remarkable beauty to the very end. The petals appear strikingly changeable, showing now a glow and then quite unique, now a soft warm velvety texture. In any light, natural or artificial, Heart of France is strikingly beautiful and will command instant admiration. The flowers are large and full, with never a trace of hollow center.

Pkt. 15c—2 pkts. 25c

MEXICAN FIRE PLANT

(Annual Poinsettia)

A variety of Poinsettia which grows quickly to a height of 2 1/2 to 3 feet from seed down in the open during May. About the middle of the summer, the top central leaves turn to rich orange-scarlet, similar to the famous greenhouse variety of Poinsettia which is so popular about Christmas time. A blaze of glory through-out the summer and fall. Can also be grown as a house plant.

Pkt. 10c—3 pkts. 25c

CHINESE Fragrant FERN

A beautiful tropical-looking ornamental foliage plant—very delicate and lace-like. Blooms profusely, and both flower and foliage are deliciously fragrant. Sprays of the foliage kept in a room or trunk will impart the most wonderful sweet perfume for a year or more. No bouquet or vase is complete without this fragrant flowering fern. Every packet of seed should produce 20 or more lovely ferns. Do not miss these perfumed beauties.

Pkt. 10c—3 pkts. 25c; Postpaid

CLEOME FUNGUS (Giant Spider Plant)

A strong, robust grower, 4 to 5 feet high, with great panicles of bloom as large as a Hydrangea and unaffected by wind or weather. The flowers are deep purplish pink when they first open, but turn to light pink, so that the lower part of the panicle is a different color from the upper. The stems are several inches long, from which it derives the name—Spider Plant. Seed sown in the open ground in May will flower in July and continue in flower uninterrupted until frost. Pkt. 10c—3 pkts. 25c.

VEGETABLE PLANTS

SWEET POTATOES

You can't grow a good profitable crop of Sweet Potatoes unless you start with good healthy slips. All our plants are carefully inspected and certified and are guaranteed to please you. Set in rows 3 feet apart, plants 12 inches apart. Set about 7,000 plants to an acre. Shipments commence about April 15th and continue until July 1st, weather permitting. Send your order early.

Strong, Healthy, Certified. Two excellent varieties: Nancy Hall and Golden Porto Rico. Postpaid: 100 for 40c; 500 for \$1.25; 1,000 for \$2.00; 5,000 for \$8.75; 10,000 for \$17.50. Ready for shipment April 15th. Order now and tell us what date you want them shipped.

CABBAGE PLANTS

Frost-Proof
(Ready for shipment January 1st)
VARIETIES: Early Jersey Wakefield, Copenhagen Market and Late Flat Dutch.

25 for 30c; 100 for 45c; 500 for \$1.50; 1000 for \$2.50

BULBS for Spring Planting

CANNAS

Sure to Bloom
Mixed varieties of the very best colors. Prices postpaid

1 doz. 40c; 25 for 75c; 100 for \$2.75

FRAGRANT TUBEROSES

MEXICAN TUBEROSE
Extremely fragrant. Grows 16 inches tall with long spikes of waxy-white blossoms well arranged. Showy in the garden or in the vase. Stands heat and drought very well.

5c each—50c per doz.; Postpaid

SALVIA

Bushy plants covered with countless spikes of tubular florets. Used for hedges and edging shrubbery.

SCARLET SAGE. Numerous spikes of vivid scarlet flowers 10 to 12 inches in length.

Pkt. 10c—3 pkts. 25c

BIRD OF PARADISE

The color of the flower is a rich golden yellow. It measures 2 1/4 inches across and is produced in very large trusses. The most beautiful part of the flower is the long incurved stamens and pistils which are spread out in fan-like form and are of bright crimson color. The color is also highly decorative. It should be grown as a house plant, except in the warmer parts of the South where it is hardy. If the seeds are started early, it will produce blooms in great profusion the first year.

Pkt. 10c—3 pkts. 25c

Angel's Trumpet

Large tropical leaves with trumpet-shaped flowers—pure white and as fragrant as jasmine. Blooms indoors in winter, and in the garden in the summer.

Pkt. 10c—3 pkts. 25c

BALSAM PEAR

Ornamental Vine with Edible Fruits
A very ornamental and curious climbing vine, with glossy green foliage. Pear-shaped ornamental fruits known to Chinese as La-Kwa, and used extensively in China as a food for human consumption. Usually prepared for the table by boiling the fruits before they are ripe. Give it a trial, both as an ornamental and as an addition to your list of edible fruits.

Pkt. 10c—3 pkts. 25c

CALENDULAS

For Cut Flowers and Abundance of Blooms
The Calendula is one of the best and showiest free flowering hardy annuals. Blooms from early summer until killed by frost. Valuable also for pot culture.

FINE MIXED. Yellow, orange, orange-red, and striped; all double flowers. Pkt. 10c—1/2 oz. 25c—oz. 40c

CANARY BIRD FLOWER

Very graceful, dainty climber with finely fringed, nasturtium-like flowers of rich canary yellow, which at a distance appear like tiny canary birds. Prefers semi-shade and fairly moist soil. Beautiful cut foliage. 10 to 15 feet.

Pkt. 10c—1/2 oz. 30c—oz. 50c

CANDYTUFT

Giant Hyacinth Flowered—Much branched plants, each branch a massive, long and thick Hyacinth-like spike of pure white. Showy and attractive in the garden; desirable for cutting as the flowers last quite a long time.

Pkt. 10c—3 pkts. 25c

GIANT PANSY

Giant-sized flower of most striking character, each petal being conspicuously curled or waved, giving them the effect of a double flower.

The colors are mainly rich dark shades, bordered, blotched, or marked in ray-like veinings with contrasting colors. Bloom freely and continuously as long as weather remains cool.

Pkt. 20c—3 pkts. 50c

COLORED VERBENAS Mammoth - Flowered

Mixture. Fine, rich-colored blend.

Pts. 10c—3 Pkts. 25c

BLUE LILY OF THE NILE

A splendid ornamental plant with bright blue flowers, spreading 3 or 4 feet surmounting with spikes of bright blue flowers which remain in bloom for a long period. It is a most desirable tub plant for porch or lawn. Should be wintered in the cellar or greenhouse. Seed.

15c Pkt.—2 pkts. 25c; Postpaid

AMARANTHUS (Rainbow Plant)

TRICOLOR (Joseph's Coat). Beautiful plant, growing 3 to 5 feet high, with ornamental leaves variegated in red, yellow and green. The large attractive flower-heads are bright crimson.

Pt. 10c—3 Pkts. 25c

ALYSSUM

Sweet (Maritimum) Of spreading growth, averaging 8 in. in height. Pure white, honey-scented flowers, completely cover the plants. Pkt. 10c; 1/2 oz. 20c; oz. 35c; 4 oz. \$1.00

MORNING GLORIES

Heavenly Blue The finest of all Morning Glories. Immense flowers measuring 3 inches in diameter; bright sky blue color with a white throat. Pkt. 10c—3 Pkts. 25c

Scarlett O'Hara A new color in Morning Glories—rich dark wine red or deep crimson. Flowers about 4 inches across. Freely produced on strong growing vines and stay open longer than other varieties. A beautiful vine which will make it one of the most popular varieties. Pkt. 15c—2 pkts. 25c

Japanese Umbrella Palm

Not a true palm, but handsome ornamental palm-like plant. Grows in water or soil. Indispensable for aquariums, fountains or pools.

Pkt. 15c—2 pkts. 25c

GIANT ZANZIBAR PALM

Zanzibarensis Ornamental Foliage Plant
From seed of this variety, sown in the open ground in May, the plants are in full foliage early in July. They attain a height of 12 to 14 feet and form a perfect pyramid of foliage and brilliantly colored fruit, presenting a beautiful tropical appearance. Enormous leaves, 2 to 4 feet across, and highly colored light and dark green, copper-bronze and dark green with reddish ribs. The plants are a real treat to the eye and the foliage is death to Japanese Beetles and Grasshoppers.

Pkt. 10c—oz. 25c

COSMOS

Delightful annuals with ornamental, feathery, fresh green foliage and large artistic flowers borne on long stems. Very effective as a background for borders and excellent for cutting. Easily grown. Height 4 feet.

Pkt. 10c—3 pkts. 25c

KOCHIA (Burning Bush)

Very handsome, symmetrical plants, forming beautiful ornamental shrubs, and growing 3 feet tall in three months. Wherever a quick-growing annual hedge is wanted there is nothing better than Kochia. Turns to a gorgeous carmine in fall.

Pkt. 10c—3 pkts. 25c

CACTUS SEEDS

Cactus make most interesting house plants, extremely odd and curious, and many have gorgeous and beautiful blossoms sweet scented, and blooming profusely. These oddities of all plants grow in many shapes and sizes, and easily grown, thrive and bloom with very little care, and endure the heat and dryness of the ordinary living room. Much pleasure may be derived in growing them from seed. Everyone is delighted and surprised at the odd appearance of a Cactus just sprouting. If you desire a fine collection of rare varieties, sow the seed in pots or boxes in a warm room in moist sand, and the seed will grow quickly. We have fresh seed of a mixture of Cactus varieties.

Pkt. 10c—3 pkts. 25c

CENTAUREA CYANUS

(Corn Flower or Bachelor Button)
A choice long stemmed strain of an old fashioned annual which never will decrease in popularity. It will grow anywhere and as a cut flower is considered indispensable. It grows to a height of 2 to 3 feet, and furnishes immense, and well shaped double flowers throughout the summer. A nice assortment of colors, including blue, purple, mauve, pink, and white.

Pkt. 10c—3 pkts. 25c

SURPRISE GARDEN MIXTURE

Hundreds of varieties of pretty flowers at practically no cost. Unsightly or bare spots in yard, along the fences, on embankments, etc., can be transformed into a delightful, attractive flower garden. This flower seed mixture is especially prepared from a select list of hundreds of sorts—the colors and varieties being carefully proportioned to produce a constant varied bloom the whole season. In no other manner can 50 many different varieties be obtained as so small a cost.

Pkt. 10c—3 pkts. 25c

FAIRY OR BABY ROSE

Roses from Seed the First Year
One of the most unique and novel pot flowers grown. The only genuine dwarf house Rose, blooming in three to five months after sowing the seed, giving about equal proportions of single, semi-double and double flowers, borne in clusters and contain all the tints and colors of cultivated Roses. Plant from seed sown in February in the house may be in bloom in June, and should bloom continuously month after month. Seed in mixture of colors only.

Pkt. 10c—3 pkts. 25c

SHOO-FLY PLANT

It is said that flies will not stay in a room where it is grown, if they can conveniently escape. What is about it that repulses them is not clear, as the plants and flowers have no odor. It is a beautiful flowering plant, and blooms in a short time (60 days) from seed. It is a profuse bloomer in pots both summer and winter, the blossoms being large, cup-shaped and of a lovely light blue color with a white center.

Pkt. 10c—3 Pkts. 25c

CHOICE VEGETABLE SEEDS

Enjoy Fresh Vegetables Right From Your Own Garden

MUSK MELONS

"HONEY DEW" THE FAMOUS MELON
This is a cross between the Rocky Ford Cantaloupe and a South Sea Island variety to lemon-yellow when ripening, and the average size is a little larger than that of a coconut. The flesh is light green, the juiciest and sweetest Musk-melon and luscious in flavor. The rind is hard. It is good as soon as picked off the vine and will keep good for months if kept in a cool, dry place. It is, therefore, a good shipper and a most splendid fruit to grow for the market. In the city markets, the Honey Dew sells at higher prices than any other melon. As a local melon, it advertises itself. The first one eaten creates a desire for more. Plant it in your home garden. It will afford you more pleasure than any other vegetable you have. Ripe fruits in 90 to 130 days, depending upon the season. Full-grown fruits that do not ripen on the vines before the fall frosts can be picked and will ripen in storage.

Pkt. 10c—3 pkts. 25c—1/4 lb. 40c

PRICES POSTPAID!

Bermuda Onion Plants

Sturdy, healthy plants ready to ship about Jan. 1. Guaranteed free from disease. Grow onions this easy way. You can get a much earlier crop of fully matured onions, or very early green onions for pulling in your garden. They will stand heavier frosts than "frost proof" cabbage plants, and even light freezes without being injured. Crystal White Wax only. Postpaid prices: 200 for 50c; 500 for \$1.00; 1,000 for \$1.75.

HALE'S BEST
Decidedly the earliest of the Rocky Ford type of shipping melons, and a most popular and profitable sort. Melons average as large as any of any class and have a sweet, sugary salmon flesh.

Pkt. 10c—3 pkts. 25c—1/4 lb. 40c

HEARTS OF GOLD

Owing to its superior quality, Hearts of Gold has taken first place in nearly all localities where it has been introduced. It is a good shipper, and just the right size to be served in halves. Average weight 1 1/2 to 1 3/4 lbs. Flesh deep orange, extremely thick, fine grained, of the highest quality and very sweet and melting. It is a money-maker for market gardeners and few, if any, are its equals for the home garden. It is a marvel of productivity. Ripe fruits in 75 days.

Pkt. 10c—3 pkts. 25c—1/4 lb. 40c

GROW PLENTY OF CARROTS

2 GRAND CARROTS

DANVERS HALF LONG. 75 days. A prime favorite because of its brilliant market appearance. The smooth, handsome roots are 6 1/2 to 7 1/2 inches long, tapering uniformly to a blunt point. Flesh is a deep, bright rich orange color, tender, sweet, and crisp. When bunched it makes the most attractive Carrot on the market, thus always selling at top market prices.

Pkt. 10c—3 pkts. 25c—1/4 lb. 50c

CAULIFLOWER

EARLY SNOWBALL. 55 days. The best for early market and shipping. Cauliflower is not difficult to grow. If your garden produces good cabbage, it should successfully grow Cauliflower. It is one of the garden's most detectable luxuries.

Pkt. 10c—3 pkts. 25c—1/4 lb. 50c

Plant Swiss Chard for GREENS

GIANT LUCULLUS. 55 days. The rich green, fleshy, heavily crumpled leaves of this variety make very tasty "greens." The erect plants attain a height of 2 to 2 1/2 feet. Largely sought after by those who prefer the thick, creamy white stems or stalks which are edible and tender, and may be served as a separate dish like asparagus. The leafy part can be cooked like spinach or turnip-greens, or if desired the whole leaf can be boiled and served as "greens." There is a delicious, delicate flavor not found in either turnips or kale.

The Best Seeds are the Cheapest Seeds!

WATERMELONS

California Honey

New Ice Box Size

The melon you have been looking for. Beautiful deep dark green color, medium thick rind and unequalled for its distinct vivid scarlet flesh. Delicious sweet flavor and fine quality.

Pkt. 10c—3 pkts. 25c—1/4 lb. 60c

STONEMOUNTAIN WATERMELON

A very large, medium dark green, round melon of excellent quality. Flesh highly colored, very solid, with fewer seeds than most varieties. The fruits frequently attain a weight of 60 to 80 pounds. The rind is tough enough to stand handling for nearby markets, but will not stand long distance shipping. We have found this somewhat earlier than other large varieties. It produces an abundant crop and can be grown successfully farther north than many of the large, long varieties.

Pkt. 10c—3 pkts. 25c—1/4 lb. 40c

Peerless, or Ice Cream

Succeeds on All Kinds of Soil
Peerless is one of the finest early, large, round melons, and is especially recommended for the home garden, as it will succeed on all kinds of soil and where other melons fail. Our strain of this melon ripens only 5 to 8 days later than the "Ice Cream" of Ukiah. The fruits are nearly as large as Kleckley's Sweet and 3 to 5 days earlier; rind light green, mottled and veined; flesh bright scarlet, melting and delicious. Few, if any, surpass it for quality or productivity.

Pkt. 10c—3 pkts. 25c—1/4 lb. 40c

Winter Watermelon

A home grown melon for your Thanksgiving dinner. It is not a citron or a true Watermelon. Flesh red, extremely firm, very brittle and deliciously sweet. Fruits taken from the field before will keep long into the late fall and early winter and retain their delicious sweetness and flavor.

Pkt. 10c—3 pkts. 25c—1/4 lb. 40c

BERRIED SHRUB COLLECTION

Six Big Two-year Shrubs that are loaded with beautiful colored berries all through the winter months. You will be surprised at the beauty these shrubs will add to your home during the winter.

2 Rhos, assorted
1 Snowberry
2 Aronia, 1 red, 1 black
1 Beauty Berry

All Six For Only \$1.00

NEW - NOVEL - UNUSUAL

Pkt. 15c—3 pkts. 30c

Delicious, Sweet and Spicy
This is a luscious tropical fruit which makes a useful as well as a charming and beautiful house plant. It bears both flowers and fruit at the same time. The flowers are pure white and delightfully fragrant. The fruit is about the size of a walnut, of a beautiful reddish color, and of delicious sweet and spicy flavor. Fine for eating out of hand, and unsurpassed for making jelly.

Ripe fruit in 80 days after seed is planted. This wonderful vegetable Peach is the most beautiful of all vegetables. They resemble oranges in color, shape and size and grow on vines like melons. They present a beautiful and tempting appearance whether canned and make delicious preserves and pickles, fine for pies. There is nothing like them. Extremely early; of the easiest culture, and very prolific.

Pkt. 10c—3 pkts. 25c

If someone were to discover a plant "Sport" or if some plant breeder could cross sunflowers or corn with potatoes, the result would be a food crop that would make silage and potatoes. It would be a plant that would make silage and would outyield potatoes two or three to one, would be similar soil and moisture conditions, we would have the results of the potato and the corn. It would do all the things and more and yet, it is not NEW for the world. It is a fact that in Europe for centuries under another name, France alone produced 1,650,000 long tons in 1928 so our Consul at Paris has been able to get the French to give us the formula under which it sometimes passes is the same as another vegetable entirely different which is confusing. The scientific name is *Helianthus Tuberosus*; it is related to both the potato and the corn. It is not a tuber, it is not Jerusalem or elsewhere. *Girasol* tuber will outyield potatoes two or three to one per acre and common *Girasol* stalks will outyield corn 2 to 3 times per acre and common *Girasol* stalks are about a third of the size of common sunflower stalks but usually two of three feet taller and yield 10 to 12 tons silage per acre. *Girasol* is not injured by freezing and it can be stored in the ground all winter long. It is harvested in the Fall or the Spring following. *Girasol* is propagated by tubers only, not from roots and joints like quack grass and Thistles so it cannot become a weed if it is mixed with pasture, hay meadow or good cropland.

All stock and poultry like Girasol tubers, but perhaps the most profitable use would be as hog feed, the hogs doing their own harvesting with no expense. Trials along this line are being made, and it is probable that this might be considered NET PROFIT. The scale of production would be more than enough to cover cost of seed, land, rental and cultivation expenses. Adding grain to balance the ration is a serious help. Every acre should have from one-fourth to one acre of Girasol so that they could turn the hogs on in the fall. It is a big money-maker for hogs.

Girasol can be eaten raw or cooked, but the Indians in Girasol that replaces starch in most other vegetables need not be cooked to bring out its food value. This crop will grow on most any kind of soil but the richer the soil the better of course, but it will do better on poorer soil than any other crop. The average weight of the tubers is more than a pound but the average is smaller and more irregular shape than potatoes. Small tubers, or large ones cut small, do not seem to decrease the crop as much as one might expect. The following prices are \$12 for 70¢—25 for \$1.25—50 for \$2.25—100 for \$4.00. Delivered to you Prepaid.

richer and more tempting than that of the potato. Land that is too wet for ordinary crops can be used to advantage in growing Daheens. They can be grown on lands that are subject to short overflows that would ruin most other crops, thus making more land available for food crops that is now considered worthless.

Choice Seed Tubers: 3 for 40c—6 for 75c—12 for \$1.25—25 for \$2.00—50 for \$3.75—100 for \$7.00.

Delivered to you Prepaid.

A new novelty Rose of a beautiful violet-blue color, as its name implies. The buds open in a reddish-violet color, quickly changing to amethyst and steel blue. A truly beautiful rose that should be planted by every rose lover.

A strong, rapid grower with good roots and strong upright canes. The blooms are produced in immense panicles giving the flower a very full and double bloom. The leaves are a rich glossy green, and strong stems hold the flowers upright. It is very hardy and disease-resistant, and will be a welcome addition to your rose garden.

THE ROSE TREE OF CHINA (*Prunus Triloba*) is the most beautiful and showy of all small trees. It begins to bloom before the leaves appear in the spring, being literally covered with very double rose-like pink flowers. As an ornament from early spring until late autumn, it is unequalled. The tree is small, compact, symmetrically formed, graceful little tree grows usually 10 to 15 feet high. It is attractive as a specimen or when planted in groups. The bark is smooth, grayish brown. The leaves are rounded, 2 to 3 inches long, 1 to 2 inches wide, with serrated edges. The flowers are double, pink, 2 to 3 inches in diameter. The tree is very hardy and will grow in any soil. It is one of these wonderful trees. Many who have seen the tree in flower have never seen. The rose-like blossoms are very fragrant. Price \$2.00, Postpaid.

(Ami Quinard)
A new variety. The deep velvety amaranth red is almost true black and the blooms are larger, prettier and more abundant. Large size, 2-yr.-old plants.
75c each, Prepaid

We guarantee all plants and seeds to arrive in first class condition true to name. We will replace, free of charge, any stock not true to name, or damaged in transit.

KUDZU THE GREAT FORAGE CROP AND SOIL BUILDER

If you have some non-productive, rough, hilly ground that has heretofore been considered worthless, you can, by planting Kudzu, transform it into one of the most profitable portions of your farm.

Kudzu is proving to be a Godsend to owners of poor land. It is a perennial legume, contains more protein than alfalfa or wheat bran, and succeeds on land too poor for alfalfa. It is perfectly hardy in the Northern States, and can be grown almost anywhere, but the South is where it thrives to perfection. It is adapted to all kinds of well-drained soils, and will succeed in practically any land not water-soaked and not a desert. It is our honest opinion that Kudzu enriches non-productive, barren hillsides more rapidly and more permanently than they can be improved in any other way.

As an indication of the popularity of this fast-growing legume for erosion control, grazing and hay production, farmers cooperating with the Soil Conservation Service in its erosion control program, have planted Kudzu on thousands of acres of eroded land not suitable for row-crop production. It is reported that last year 5,000 acres were planted in Georgia alone and 4,000 in North Carolina. The manner of growth prevents the soil from washing, and the roots penetrate so deeply as to make it proof against dry weather. Kudzu rapidly improves the soil by drawing nitrogen from the air. Poor, wornout land soon regains its fertility and becomes richer every year.

Kudzu makes a good permanent pasture. It has never been troubled with disease or insects. As a hay crop, one or more cuttings can be made each year in the North, and from two to four in the South. Instances are known where four cuttings of hay, averaging 2½ tons per cutting, have been made, making a total yield of ten tons per acre in a single season.

Kudzu does not have to be cut at any certain time to save it, and may await the convenience of the farmer. It cures quickly, retains its bright green color, and the leaves do not drop off. A shower of rain does not ruin the hay. It can be harvested when weather conditions are unfavorable for other hays and will yield a fine quality of hay, often when continued showers and dampness would ruin any other legume hay.

KUDZU FOR COWS—Growers report that when fed to cows, Kudzu produces more milk than from any other one feed.

KUDZU FOR HORSES—It is not injurious to horses and is perfectly safe for all stock, when fed either green or dry. Does not cause sickness of animals even when overfed.

KUDZU FOR POULTRY—When moistened, Kudzu hay becomes almost like fresh foliage again and makes an excellent green ration for poultry, rabbits, etc., in the winter.

Kudzu should be given cultivation the first season. A full crop of corn, a good crop of potatoes or any other similar crop may be raised on the same land the first year, so the farmer does not lose the use of the land. After the first year no cultivation is needed, as the plants will cover the ground and

A Field of Kudzu

take root at the joints after the manner of strawberries, growing so rapidly as to choke out weeds and other plants. In spite of this manner of growth, it is an easy matter to get rid of Kudzu if desired, for it has a peculiar habit of neither blooming nor bearing seed under field culture, and the plants will sprout only from the crowns and can be killed by cutting off these crowns with a disc plow in hot, dry weather. When the crowns of Kudzu roots are cut off and exposed to sunshine for half a day or so they are killed, and the roots decay. Another method of eradicating Kudzu in case one desires to put a field back into intertilled crops, is to plow late in the fall, and plant the following spring to corn, beans, potatoes or any other crop that can be given careful cultivation. While Kudzu will stand more abuse than almost any other plant, it is much more easily eradicated than alfalfa if one wants to get rid of it. Kudzu absolutely cannot become a weed pest.

Growers are now propagating it almost entirely by transplanting young plants from old Kudzu fields. They prepare the ground the same as for a crop of corn and set plants 5 to 10 feet apart each way. While it is a common, everyday matter for a man to set out a number of acres of cabbage, tomatoes, tobacco or sweet potatoes, setting each plant by hand, it is rather a shock at first to consider putting out a hay or pasture field in this manner. When we come to scrutinize this objection, however, it seems to vanish into thin air, for the common practice of setting the plants ten feet apart calls for only about 450 plants to the acre. This is a job not nearly so expensive as seeding an acre of alfalfa; especially is this so when we take into consideration the fact that Kudzu does not have to be fertilized or limed.

PROSO—THE WONDER EGG AND MEAT PRODUCING GRAIN for Poultry

Here is a new Poultry Grain which owes its origin to Russia, that enables you to raise your own feed. If you only have a small plot of ground, you can raise an enormous crop. Proso is unlike anything you have ever seen in this country. It grows more rapidly and matures quicker than other grains. It reaches a height of three to four feet, stools and branches, making fifteen to twenty-five heads instead of one. That is why it yields such enormous crops from such unbelievably small plots of ground. The Sarasota County Tribune, May 5, 1931, of Sarasota, Florida, says: "Our test plots of Proso have drawn visitors from many miles around."

Fowls Prefer It to Other Feeds

Prof. Hansen says of Proso: "When it is hulled and cooked for the table, the Russians call it Kasha, and it is used extensively in European Russia, Siberia, Turkestan, Mongolia and other parts of Asia. This is specially valuable grain. For feeding stock, poultry, etc., it is equal to, or better than wheat."

It is also used in those countries for flour and making into bread. In Russia, one buys Proso bread just as you buy wheat bread here. It is extremely palatable, and fowls prefer it to any other grain. In our experimental plant, the fowls leave all other grains once they have tasted Proso. Try it yourself. Put a handful of Proso in your mash feeder and watch how the birds do not touch the mash so long as any Proso remains.

Wonder Egg and Meat Producer for Chickens, Ducks and Geese

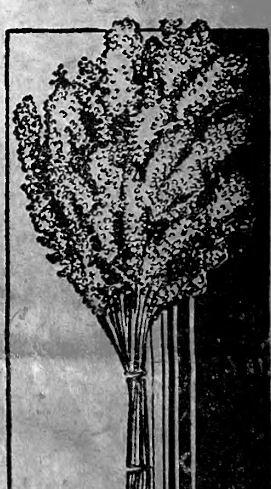

Proso makes a splendid mash when ground alone. When feeding with corn or oats the ratio should be four parts Proso to one part other grain. It may be fed in bundles as the kernels are readily scratched out of the heads, or it may be fed as clean grain from the thresher. Produces more eggs and meat per bushel than ordinary grains.

Fine for Hogs, Cattle and Sheep

Grows Anywhere; May Be Planted Late

Although a native of Russia, Proso does better, grows faster and matures quicker in our climate. During the fifteen years since it was first introduced in this country it has become acclimated so that it now grows here just as well as our native crops. It may be planted any time after corn planting time up to the middle of July.

Proso may be planted in high, dry soil that is not suitable for other grains. It is especially valuable as a summer "catch crop"—something that may be planted on land which has had an early crop removed, or ground that has been drowned out and not in shape to work until late in the season.

The above illustration shows a stalk of Proso grain heads. Notice how hardy and bushy this plant is. It grew to a height of 3½ feet, stooled and branched, producing 21 heads, on one of which were 1185 grains. One authority tells us that a half-pound of seed should produce 5 to 10 bushels of grain.

BUY PROSO SEED AT THESE SPECIAL LOW PRICES

There has never been enough Proso produced in this country for commercial use. We have plenty of seed for our customers who wish to get a start of Proso, but we urge that you get your order in at once so you can be sure of securing your supply.
